

NEWMETRICA

Innovation in quality of life measurement

25 years research into animal pain assessment

Measuring the impact of chronic pain/disease on health-related quality of life (HRQL)

VETMETRICA

- ◆ Only validated structured questionnaire available to measure health related quality of life (HRQL) in sick as well as healthy dogs
- ◆ Measures the impact of chronic pain
- ◆ Measures the impact of any chronic disease that affects quality of life
- ◆ Feline HRQL Scale with optional osteoarthritis disease specific module available within 6 months.
- ◆ Electronic data capture ensures no missing data, increased respondent compliance, minimal bias
- ◆ Developed to comply with FDA 21 CFR 11 guidelines for EDC
- ◆ Potential reduction of up to 35% in number of animals required in clinical studies, thus saving time and money
- ◆ Access to data in real time 24/7
- ◆ Customisable web platform – add trial specific questions – collect and report all data concurrently

Measuring Acute Pain

- ◆ Scientifically derived intervention levels for analgesia
- ◆ Provides guidance as to when an animal requires rescue medication; better informing drug trial
- ◆ Validated translations available for multi-centre trials
